DETAILED ACTION

Formal Matters

Claims 16, 20, 24, 62 are pending and under consideration.

Response to Amendment

Applicant's amendment filed 1/14/2004 has been fully considered. The rejections over the cancelled claims 1-15, 17-19, 21-23, 58-60 are moot and thus withdrawn.

New issues are set forth below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 16, 20, 24 and 62 are rejected under 35 U.S.C. 102(e) as being anticipated by US 2002/0102677 (Jegla). US 2002/102677 has a priority date of March 21, 2000.

Jegla discloses the cloning and expression of a KCNQ5 potassium channel (¶ 0009). Since the nucleic acid of Jegla et al. is 100% identical to the nucleic acid of SEQ ID NO: 2 claimed in the instant application (see Sequence Comparison C, attached), claims 16 and 62 are anticipated. Jegla also discloses cloning of the KCNQ5 nucleic acid into vectors (¶ 0124) and transfection of the vector into host cells (¶ 0132), thus claims 20 and 24 are anticipated.

Conclusion

No claim is allowed.
